Alpine® Direct Chill

**Hydro Guard™ Encapsulated Valve.
Sanitary, Safe & Sensible!**

**Direct Chill with push button valve. Clean healthy water with
sealed system prevents bacteria from growing in reservoir.
Water Fountain of the Future!**

Push button valve with Alpine® Hydro Guard™

Easy push button sanitary dispensing system complete with Alpine's® Hydro Guard™ valve cover with silver impregnation prevents hand to valve bacterial contamination.

High Capacity Chilling

Supports high usage and provides up to 11 gallons per hour or 120 cups simultaneously drawn each below 50°F. Replaces water fountain.

Internal filter bay

Store filters out of site and safe from tampering.

Built in cup dispenser

Convenient integrated dispensing for most cup sizes.

Integrated Leak Lock®

Electronic shut off in case of internal leak due to fluctuations in water pressure. **Leak Lock®** is not a warning device, but a true shut off system. The only true preventive system that works.

Adjustable floor glides

Easy adjusting floor glides for balance.
