COOLER SNO-CONE MACHINE

The most unique sno-cone machine in the industry. Our patented design was developed for the rental & party industry, but has been popular everywhere. The roto-molded plastic cabinet gives you ultimate durability and light weight (about 34 lbs). Our exclusive wheels/handle system provides easy portability not available anywhere else. Same production capacity as our other machines. 3-year warranty.

The Cooler—exclusive patented design.

The look attracts attention wherever this machine goes. We tested this machine by throwing it onto concrete from 15 ft. up. It bounced off! We plugged it in and went back to work! This machine is designed for events and parties. It's open access back and smaller cabinet size is perfect for smaller crowds. The light weight and wheels lets almost anyone handle and move this machine with ease. A cup dispenser is included! The stainless-steel blades are adjustable to effect the fineness of the crushed ice.

With Paragon sno-cone machines, you don't have to worry about which model has what motor or certifications.

We use the same heavy-duty motor on all models and every machine is ETL and NSF approved.

So you can make your choice based on functional needs and budget and not worry about quality.
